Points for attention before installation

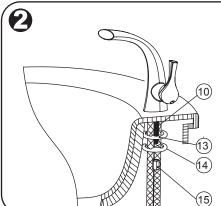

- Before installing the new mixer, it is essential that you thoroughly flush through the supply pipes in order to remove any remaining swarf, solder or other impurities. Failure to carry out this simple procedure could cause problems or damage to the workings of the mixer.
- Work water pressure: Min.0.5kgf/cm²/ Max. 5kgf/cm². (Including cold
- and hot)
 If the pictures and statements in the 'Installation Specifications' is unconfirmed with practicality, please take practicality as standard.

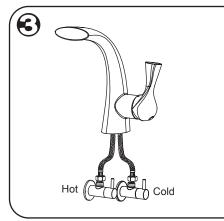

FAUCET INSTALLATION STEP

MAINTENANCE

CAUTION: Always turn water OFF before removing existing or disassembing the faucet. Open faucet handles to relieve water pressure and insure that complete water shut-off has been accomplished.

To keep the surface clean and bright, please clean the faucet regularly, please abide by the following procedures:

- Use rinsing water and soft cloth, clean bilge and bilge membrane on the surface to the best of the abilities.
- 2. Cleaned the residua with the following cleansers only.
- ☑ Soft liquid cleanser.
- ☑ Colorless glass cleanser, totally soluble powder cleanser without abrasive capability.(Mixed by instructions.)
- ☑ No abrasive cleansers waxes
- Never use cleanser, emery cloth or handkerchief which can rub.
- Never use cleaners containing abrasive cleansers, ammonia,bleach, acids, waxes, alcohol, solvents or other products not recommended for chrome.
- After cleaning, use rinsing water to clean all cleanser immediately and drying with a soft cotton cloth.
- Carefully dismantle the aerator regularly, rinse under clean running water until any loose debris is cleared to avoid the influence to water outflow.
